

The cyberwatching.eu is the **European observatory of research and innovation** in the field of cybersecurity and privacy. It promotes the uptake and understanding of cutting-edge cybersecurity and privacy services which emerge from Research and Innovation initiatives across Europe

OBSERVATORY

- Monitors all R&I initiatives across the EU – already 150 identified!
- Collects the on-going activities in the field of cybersecurity & privacy
- Allows to collect the feedback in terms of effectiveness & usability of research results
- Provides synergies & convergence for future funding

CATALOGUE OF SERVICES

- Online catalogue of R&I results and services
- Service-oriented offers, improving the lives of end-users
- Opportunity for the R&I initiatives to showcase their results
- Helps to avoid dispersion of efforts and investments

MARKETPLACE

- Connects research results with demand and supply side
- The “suppliers” provide cybersecurity and privacy R&I results, solutions, tools and trusted services
- The “buyers” find answers to their needs!
- The win-win mechanism can take place both at research synergy level and at commercial level opportunities

SME END-USER CLUB

- SMEs are granted access to the cybersecurity and privacy catalogue and marketplace
- possibility to get tailor-made, SME-friendly products
- tool to measure the ‘GDPR temperature’ - potential exposure to the GDPR sanctions
- Webinars on legal compliance with GDPR, cybersecurity standards, cyberinsurance, etc.
- Cyberinsurance for SMEs – 10 things you want to know
- Tool to estimate the cost of the cyberinsurance
- Participation in 10 SME workshops
- Networking with the relevant cybersecurity actors
- Visibility (e.g., through a one-pager that every company will have on the project’s website)
